**Please don't dial 911 for fun or misuse 911 !! Nor misuse SOS-emails or FB-postings !!**

## Calling 911:

You can call 911 in two different ways:

- First always unlock the safety pin !!
  - Press the big red SOS button
  - Shake your Phone
- (Please be careful, while shaking the Phone, so it does not fall out of your hand accidentally !)

For calling 911 unlock & press or shake the Phone

## SOS email, facebook SOS posting:

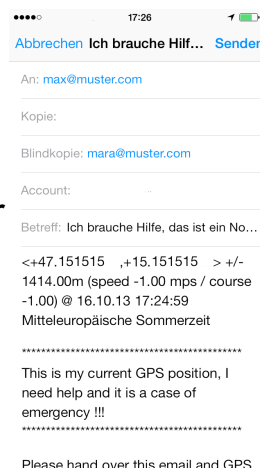

You can send two kinds of SOS-messages:

- Email SOS with two email recipients
- Facebook SOS posting to your fb account

(Before using these options it is essential that you setup the two email addresses in the setup and that you fb account is setup under your Phones preferences!!)

SOS-emails and SOS-fb-postings include the following information:

Your current GPS position latitude, longitude (decimal), speed, bearing, altitude. Also your mobile phone number if you entered it in the setup)  
The message asks to hand all this data over to the local authorities.

## Tips

Call 911 only in real emergencies !

**UNLOCK THE SAFETY PIN BEFORE DIALING 911 !!**

For SOS-email only use person or family members you can really trust !

You can also now use the new speed dial button, configure it in the setup !

If you are using the SOS Facebook posting function, please think of how many people will receive this

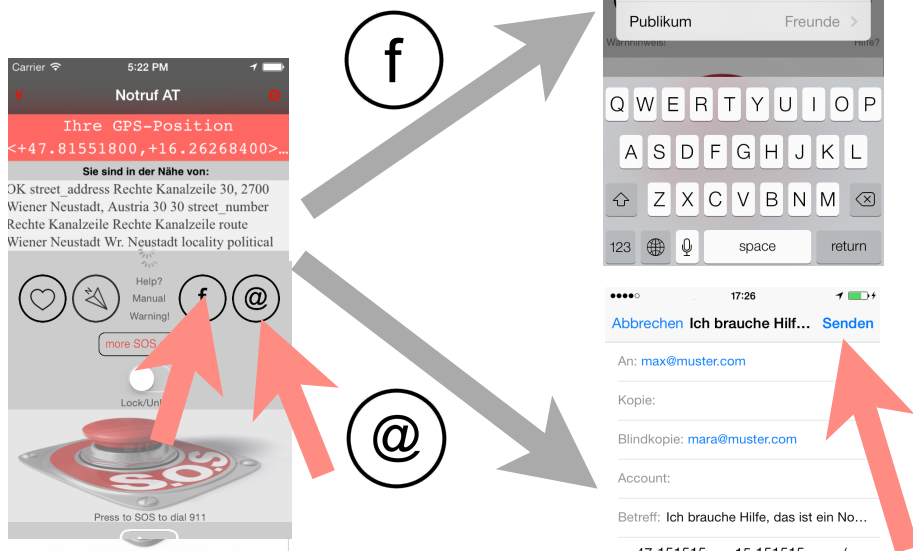

In a case of emergency, first calm down ! Only if you calm down, you can make the right decisions !

**Where, What, How, Who ?**

## Important for sending SOS-email,fb:

- After pressing the button you have to press the "send" or "post" button additionally !!

## Tips

When sending SOS email, fb press "send" or "post" button additionally !!

Warning don't look in the flash directly, while using SOS or Strobe flash!

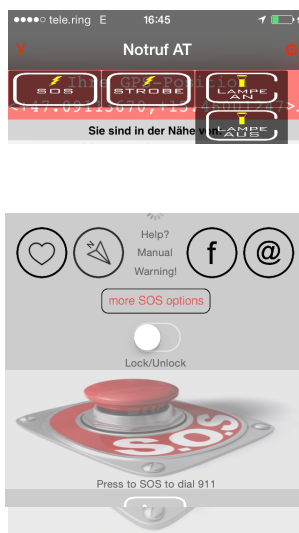

Warning! The Strobe-flash uses 20 Hz with 45 Lumens this may disorientate subjects!

Don't use this function of for fun !!

## Light, Flash-, Torchfunctions:

- Lamp on /off
- SOS flash (flashes for 10 sec., can not be interrupted!)
- Strobe defense flash 20 Hz(flashes 15 sec.,can not be interrupted!)

While using the SOS or the Strobe defense flash these functions can not be interrupted until the 10-15 sec. time is over,while these functions are working all other dialing functions, SOS email, fb functions are disabled !

In a case of emergency, first calm down ! Only if you calm down, you can make the right decisions !

Where, What, How, Who ?

## GPS Position:

GPS position is displayed in decimal values, first value latitude second value longitude.

## Speed dial:

With the speed dial option, you are able to call one of your loved ones or somebody you can trust, configure the telephone number of this person before first use in the setup !

## Compass

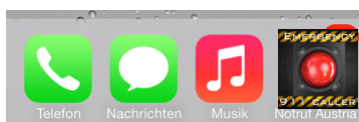

- Compass
- Bearing in degrees
- Altitude in feet

For bearing and altitude press the compass !

## Put the call-911 app in the dock

We recommend to put the app in the dock !

## Tips

Outdoors the accuracy of the Phones GPS receiver is much accurate !

The function "nearby" needs an internet connection !

Put the app in the Phone dock, start area - Just press on the icon for a longer time and move it there !

We recommend 3G mode for faster "nearby" address displaying, nearby address will be renewed every 20 sec. It is a good idea to stay in place for more accuracy for a moment if its possible !

In a case of emergency, first calm down ! Only if you calm down, you can make the right decisions !

**Where, What, How, Who ?**

## Setup

- Please enter two email addresses (of course you can also enter the same email addresses twice !)
- VIP-telephone number is the speed dial number
- You don't have to enter your mobile phone number, but it is a good idea to do so, so authorities are able to make a radio bearing, to find you much easier in case of an emergency only !

If you have entered all data, please save all information to your Phone, by pressing the save button, if you want to change some data afterwards, you have to release the safety catch, before you can change something !

Always test the SOS email function, if the recipients really received the SOS emails (spam?!)

Safety catch

Don't forget to save all !!

## Tips

It is a good idea, but not a must, to enter your mobile number, for radio bearing by the authorities to find you much faster in case of emergency !

You can also enter the same email address twice !

Use the Save button to save all data to the phone ! Want to change some data ? Unlock the safety catch first !

In a case of emergency, first calm down ! Only if you calm down, you can make the right decisions !

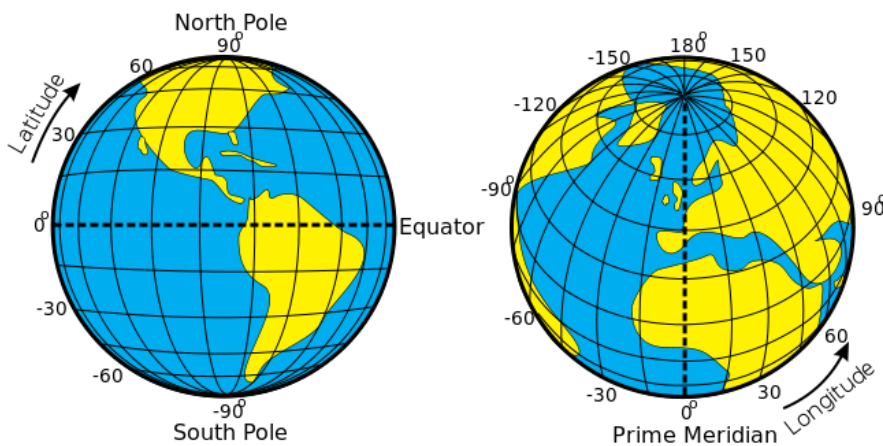

**Where, What, How, Who ?**

## Latitude and Longitude

Every position on earth can be described with **latitude** and **longitude**. There are several variant forms of spelling, in this app the decimal form is used, but there are also others like minutes and seconds of degrees.

The benefit of the decimal form is, that you can

## Tips

Latitude, Longitude  
what's that ?

Is a method to describe  
any position on earth  
exactly !

Use Google maps to  
cut & paste decimal  
lat./long to see the  
position on a map !

In a case of  
emergency, first calm  
down ! Only if you  
calm down, you can  
make the right  
decisions !

**Where, What, How, Who ?**

## Your current position while calling 911 on the display!

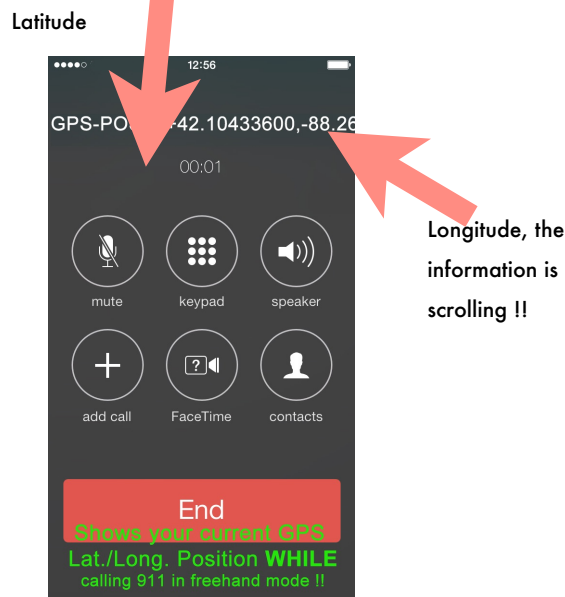

- While calling 911 follow the emergency operators instructions !
- Give him your current GPS position ! Where are you ?

### Therefore:

**Use the hands-free mode of the iPhone, press speaker -**

**You will see your current GPS- Position the display as a scrolling marquee, showing first latitude, second longitude (in decimal values) !**

**This function only works if you have**

Changes as well as spelling and typing errors may appear, the author of this document is not responsible for theses errors. The manual is a "living document", which is constantly expanded and improved! Exclusion of damages claims, warranty - !Exclusion of liability ! Exclusion of warranty and guarantee !

The author reserves the right not to be responsible for the topicality, correctness, completeness or quality of the information provided. Liability claims against the author which refer to damages of material or immaterial nature caused by use or disuse of the presented information or by the use of faulty and incomplete information are generally excluded.

## Tips

To tell the emergency call center operator you current position, use the hands-free mode of your iPhone and tell him the values of the marquee in the display !

Give the app access to your address book to display the GPS-data, while calling 911
