

Quickstart, help, manual *iFormula* Password-Pandora Mac, iOS sync:

Real-Time Security

- Turn on Wifi on both device, iOS and Mac!
- Be sure they are connected to the same Wifi, WLAN network
- On your iOS device (iPhone, iPad) navigate to your desired password, touch it and open the password subview „Secure Area“, the black „Secure Wifi transmission“ button is grayed out at the moment, stay there ! Be sure the iOS device does not lock if you need additional time to do the following steps !
- Open your Password-Pandora on your Mac, navigate to the Sync box button“ and open the sync box window !
- The Sync box will now automatically scan for Password-Pandora iOS devices (spinning antenna symbol), your iOS device should shortly appear in the „Password-Pandora Service available“ List.

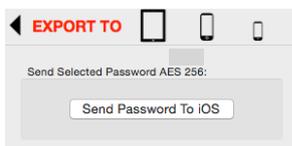

• Select your device and press connect.

• A message appear that the secure connection was

established !

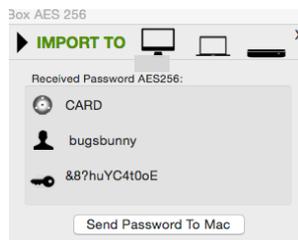

- Send a password from your Mac to your iOS device by just selecting it in your green Password-Pandora main view and press the „Send Password To iOS“ button, on your iOS device a message indicates that, a secure password was received and stored to your devices database ! Password-Pandora never ever overwrites an existing password, all passwords, even if they have the same service name, will be added additionally

- To send a Password from your iOS device to your Mac just press the „Secure Wifi transmission (which should now be activated, dark black, if an secure connection was established to the Password-Pandora Mac version.

- To add the new password to your Mac's Password-Pandora secure database just press the „ Send Password to Mac“ button. The password will added additionally, no existing password will ever be overwritten by Password-Pandora !

- If you leave the password subview area „Secure Area“ from your password, the transmission to your mac or iOS device will stop for security reasons at once !
- Every time you would like to secure sync another password your have to establish a new connection by selecting your iOS device and pressing the „connect“ button in the Sync box of your Mac's Password-Pandora Software ! While the secure connection is established between the devices, the iOS device have to be unlocked, if the screen is locked the connection is dropped for security reasons!

Password-Pandora Mac, iOS Password reset, changes

Resetting a password is not supported for security reasons by Password-Pandora, the only option to do so is to completely delete the iOS app, be sure you secure synced all your passwords to your Password-Pandora Mac version and have maid a backup there.

All Password will be gone on your iOS device if you delete and reinstall the app ! The Mac version does not offer a pass-word reset or change at all !

Password-Pandora Mac, iOS Security

All transmissions are encrypted with 256 bits asym., Real time encryption means that at any time no password data is left behind decrypted, not in the iOS device, not on your Mac, nor while a secure Wifi transmission was established !

Password-Pandora iOS Search Function

For security reasons only an exact search can be done with the iOS version, that means you have to know the exact term your are looking for ! example, if your are looking for your amazon password, only tipping „amazon“ in the search field, terms like „ama..“, „amaz* “ will not work !
